

FULL-TIME RESEARCH ASSISTANT

Arthritis Research Canada is seeking a Full-time Research Assistant for a series of community-based randomized controlled trials on a physical activity counselling intervention.

Arthritis Research Canada (ARC) is an independent, not for profit charitable organization that is home to Canada's largest and most successful clinical research centre. Since its creation in 1999, the Centre has earned international attention and recognition. The mission of the centre is driven by the vision of its Board of Directors, Research Scientists and staff members who are focussed on research related to prevention and early diagnosis for the treatment of arthritis.

ARC is located just 20 minutes via sky train from waterfront station in Vancouver to Lansdowne Centre in Richmond or less by car and we provide free parking.

Consider joining our committed team of staff and being part of an innovative, inclusive and rewarding workplace.

Responsibilities include, but are not limited to:

- Assist in recruitment and data collection in randomized controlled trials using Fitbit and a counseling/self-management intervention in people with osteoarthritis and rheumatoid arthritis.
- Involve in offsite data collection at Fraser Health and Vancouver Coastal Health locations.
- Schedule participant appointments
- Monitor adherence to the online intervention protocol during data collection
- Assist in preparing and monitoring study equipment (e.g., accelerometers)

Qualifications and skills include:

- BSc or MSc degree in a relevant field
- Excellent communication skills by phone and emails
- Good knowledge in the use of wearable physical activity trackers and the related privacy issues
- Proficiency with MS Office, particularly Word, Excel and PowerPoint
- Attention to detail, and superb ability to multitask, prioritize work and meet deadlines
- Ability to work in a team environment and independently
