For best results, we recommend editing our presentation and poster templates using **Microsoft PowerPoint.** However, if you wish to use Canva for this purpose, you can download our Canva template available on <a href="https://www.arthritisresearch.ca/brand">www.arthritisresearch.ca/brand</a>

## **Working with Logos**

- Make sure you always use **official up-to-date logos**. You can find Arthritis Research Canada and our affiliated Universities' logos on our website <a href="www.arthritisresearch.ca/brand/">www.arthritisresearch.ca/brand/</a>
- Always ensure logos are not stretched out by always resizing from the corners.
- Don't manipulate logos by removing backgrounds, changing colours or cropping them. It's always good to check the organization's logo guidelines to follow their best practices.
- Always leave enough space around logos and other elements.
