

Understanding the experiences of individuals with rheumatic disease during the COVID-19 pandemic

After 3 months, we have gathered 701 responses from individuals living with rheumatic disease. They shared that:

21

average number of hours spent at home

61.5%

practice physical distancing

52

underwent testing for COVID-19

Health behaviour changes during the COVID-19 pandemic

40.2%

sleep

52.6%

physical activity

37.1%

need more information about COVID-19

54.2%

are concerned about attending a medical appointment

If you have not yet shared your experiences with living with a rheumatic disease during the COVID-19 pandemic, we would love to hear from you.
